

TWEEDIE - SIDE

The Tweedie family takes its inspiration from the nomadic lifestyle – a sense of lightness, practicality, and mobility.

The coffee and side tables are made from bent steel cross frames that support a timber veneer or fibre cement surface top - with the side table featuring a cotton canvas sleeve to hold magazines, books or other reading material.

Easy to re-arrange and move from room to room, Tweedie's simple and minimal aesthetic will complement the modern home of office space.
